Public Release

VSP-PR-002 / REV 01 / PUBLIC / ISSUED 25 NOV 2026

FOR PUBLIC RELEASE

Vesper establishes controlled public media package

25 NOV 2026

Vesper has published its first controlled external media package, consolidating approved organization language, current identity assets, citation guidance and public-affairs workflow into a single revisioned release.

The package is designed to make external representation boring in the best possible way: current assets are identifiable, material changes can create revision history, and obsolete material does not silently become current again.

Approved description

Vesper is an independent advanced-systems and applied-research project established in 2026. Its public work focuses on resilient systems, bounded autonomy, security engineering, infrastructure and human-machine coordination.

Media inquiries

Use the Media route in Public Correspondence. No guaranteed response-time SLA is represented.
